**DEPEND ON DAVEY** to take yet another quantum leap forward with their **NEW** 2005 Series Firefighter® range. These new pumps offer a host of new features to make installation, operation and maintenance easier, quicker and more dependable.

## EASIER TO USE

### **NEW** SUCTION CONFIGURATION

The pump inlet is now incorporated into a more compact suction housing, held in place by fewer fasteners for easier access to the suction flap valve and the other pump internals and lower servicing costs.

### **NEW** CHOICE OF SUCTION SIZES

The new suction housing comes standard as 1½" BSP, but is available as 2" for larger horsepower models, and in NPT threads for selected markets.

### **NEW** LARGER CAPACITY TWIN IMPELLER CASINGS

To ensure the fastest self priming times, the new twin impeller models feature a larger suction housing. Depend on Davey to make a pump really work for you.

## BETTER SELF PRIMING

### **NEW** LARGER PRIMING AND DRAIN PORTS

Make it quicker and easier to fill and empty the pump.

Not only does this make it easier to fill your pump for priming, but also makes it easier to drain and flush the pump out after use.

### **NEW** BAYONET STYLE PRIMING AND DRAIN PLUGS

Incorporating a decompression function and a safety retention system, these new plugs make it easy to safely access the priming and drain ports.

With no tools required, a simple 90 degree twist of the wrist and the plug can be released.

To allow for the fitment of pressure gauges and drain cocks, a special version plug with a ¼" BSP tapping is available as an optional item.

## MORE OUTLETS

### NEW INTEGRAL HANDLE

Conveniently positioned and comfortable to grip, the new handle saves on weight without compromising strength.

### NEW FOUR-WAY DISCHARGE

Allows for easy installation and more connection options with 2 x 1½" and 2 x 1" outlets. High quality discharge caps are retained by corrosion resistant flexible restraints. Standard on all single and twin impeller models up to 7hp.

### NEW THREE-WAY DISCHARGE

Allows for easy installation and more connection options with 1 x 2" and 2 x 1" outlets, plus a huge 1½" priming port which can also be used as a discharge port. High quality discharge caps are retained by corrosion resistant flexible restraints. This discharge is standard on all 9hp, 10hp and 13hp models.

## MORE DURABLE

### NEW DUAL FLOATING NECK RINGS

Patented independently floating neck rings are fitted both front and rear of the impeller to ensure optimal pump performance is maintained, even after weeks of abuse.

### NEW THRUST BALANCE

All centrifugal pumps are capable of subjecting axial (parallel to the shaft) thrust to the engine. The higher the pressure the greater thrust potentially created, which can shorten engine life. The **NEW 2005** Series Firefighter® range incorporate a thrust balance drum and pressure equalization holes in the impeller. This special design reduces the axial thrust down to only one third of other similar pumps.

### NEW PATENTED CLAMPED IMPELLERS

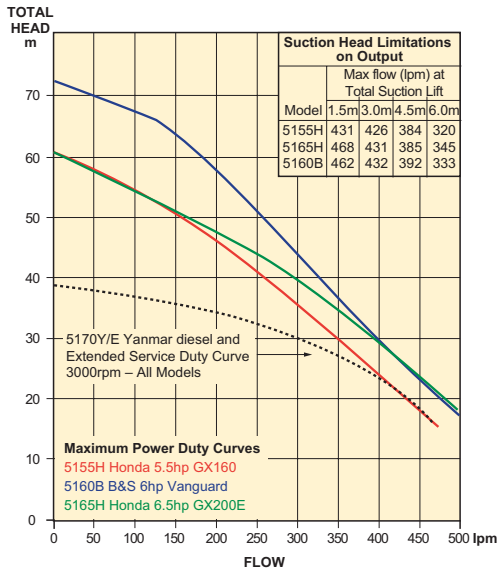

Davey's unique clamped impeller design allows for optimum impeller shape and internal surface finish for increased performance. Amazingly this patented feature also makes it possible to quickly disassemble the impeller/s, making cleaning accidental obstructions easier.

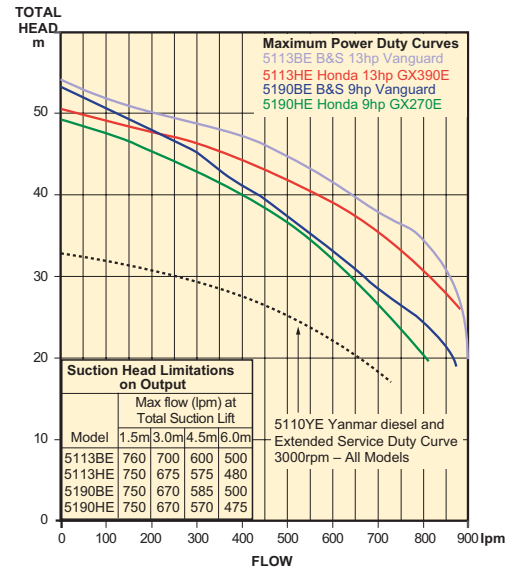

### NEW HIGH QUALITY EPOXY POWDER COATED CASINGS

Not only do the **NEW 2005** Series Firefighter® pumps feature the high quality Davey powder coat finish on the outside, they also have the same high quality finish on the inside! This resilient finish helps to extend the life of your **NEW** Davey pump.

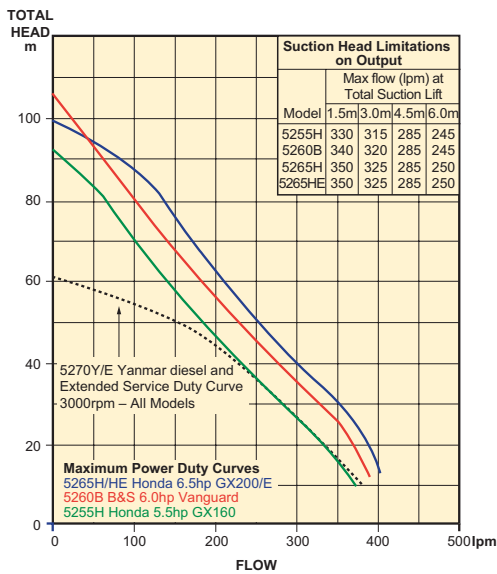

## SINGLE IMPELLER 5.5 TO 6.5hp PERFORMANCE

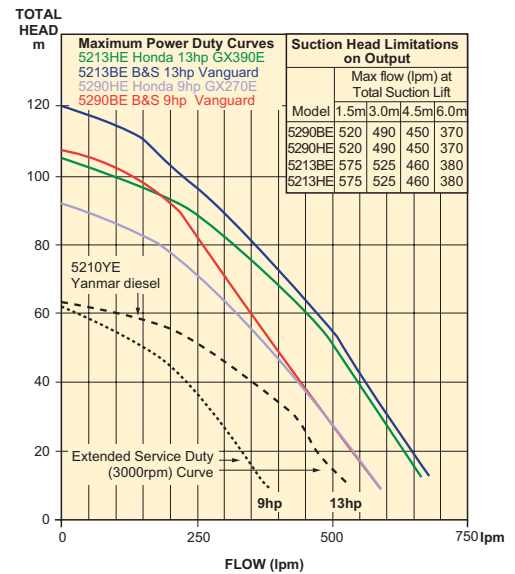

## SINGLE IMPELLER 9 TO 13hp PERFORMANCE

## TWIN IMPELLER 5.5 TO 6.5hp PERFORMANCE

## TWIN IMPELLER 9hp PERFORMANCE
